THE RIGHT BRIEF MATTERS

SMART & SOFT

ABOUT SMART & SOFT

- The Soft & Smart seamless fixation briefs support absorbent pads for all levels of incontinence while offering high breathability and the aesthetics of normal underwear.
- The lack of seams in the waist and sides together with anatomically placed Elastane fixation zones provide for comfort without irritation as well as a feeling of leakage security.
- The highly stretchable, soft polyester fibres smoothly follow the contours of the body and the absorbent pad.
- A combination of design and high-strength fibres offers extreme cost-effectiveness in a product that can be washed and tumble-dried numerous times.
- A colour size coding on the inside of the brief helps caregivers find the correct size easily and quickly.

SMART & SOFT

ABOUT TWO-PIECE SYSTEM

With the two-piece, Pad&Pant system we are combining effectiveness with understanding and respect. A large number of users can benefit from an effective fixation of pads or dressings providing a leakage secure, comfortable and at the same time cost effective solution. This is a perfect and more economic alternative to ordinary diapers with adhesive tapes.

FUNCTIONALITY

- Maximum leakage security due to the special design and materials
- The pad is fitted perfectly and close to the body
- Soft leg opening to avoid red marks
- The open structure of the Pad&Pant system allows the skin to breathe
- Tested for harmful substances according to OEKO-TEX STANDARD 100

CONVENIENCE

- Designed for easy change of pad also when standing
- Improved comfort and better anatomic shape than by all-in-one products

BENEFITS

A Pad&Pant solution is generally less expensive than an all-in-one solution (pull-ups, tape diapers) due to:

- Perfect and tight fit to the body allow use of smaller products
- Better comfort and high leakage protection mean fewer changes of pads
- The flexibility created through the wide range of products and sizes gives better individual solutions
- Efficient product design reduces material needs, lowers costs, and can contribute to waste reduction

TYTEX BESTFIT™ GUIDE

PATIENT STATUS / INCONTINENCE	LIGHT 💧	MEDIUM 💧💧	HEAVY 💧💧💧
Bedridden / Institutional 	A	A	B
Mainly seated / Institutional 	A	B	C
Fully mobile / Institutional 	B	C	C
Own home 	D	D	D
